Certifications

Foundations of Cybersecurity
The Recreational UAS Safety Test (TRUST)
Play It Safe: Manage Security Risks
Microsoft Technology Associate (MTA)
Connect and Protect: Networks and Network Security

Hugo Luna

Security Infrastructure Lead | IAM & Zero Trust Architecture |
Incident Response
Dallas-Fort Worth Metroplex

Summary

Infrastructure and Security Engineering Lead specializing in high-availability environments, endpoint security, and risk mitigation. Transitioning from managing massive, distributed physical architectures to enforcing logical access controls and Zero Trust policies. Proven track record of securing and maintaining continuous uptime for large-scale enterprise deployments (170+ nodes). Highly skilled in reverse engineering and system architecture, having independently founded and contributed to the DaedalusX64 emulator project (under the alias Shinydude100), demonstrating deep-level comprehension of hardware-to-software resource allocation. Adept at transforming reactive break/fix operations into proactive, automated governance frameworks.

Experience

Confidential

Systems Infrastructure & Endpoint Security Lead
June 2024 - Present (2 years 1 month)
Dallas, TX

Directed the operational lifecycle of a 170+ node distributed physical network, enforcing High Availability (HA) and continuous service delivery across enterprise endpoints.

Executed rapid Incident Response (IR) protocols and physical disaster recovery, aggressively minimizing Mean Time to Recovery (MTTR) through advanced component-level hardware remediation.

Established rigorous Configuration Management controls and Standard Operating Procedures (SOPs), aligning field operations with structured IT governance frameworks.

Directed data extraction and chain-of-custody protocols for physical security systems, ensuring the Confidentiality, Integrity, and Availability (CIA Triad) of highly sensitive investigative footage.

Clay Cooley Nissan Irving
Asset & Supply Chain Logistics Specialist
March 2023 - August 2023 (6 months)
Irving, Texas, United States

Managed physical asset lifecycles, inventory auditing, and supply chain integrity protocols.

Conducted regular cycle counts and utilized enterprise resource planning software (CDK) to resolve data discrepancies and maintain strict inventory accuracy.

Amazon
Tier 2 Incident Response & Escalation Lead
April 2020 - May 2022 (2 years 2 months)
United States

Managed complex Tier 2 incident response protocols across distributed networks, diagnosing severe operating system and networking protocol failures.

Enforced strict Service Level Agreement (SLA) compliance and escalated critical faults to backend engineering teams via enterprise ticketing infrastructure.

Mentored Tier 1 operations personnel, mitigating escalation rates by establishing standardized troubleshooting methodologies.

Confidential
Endpoint Security & Operations Coordinator
October 2015 - September 2020 (5 years)
Dallas/Fort Worth Area

Architected the deployment and lifecycle management of 58+ enterprise endpoints, ensuring strict operational efficiency and system reliability.

Executed Vendor Risk Management (VRM) protocols, negotiating hardware procurement and optimizing capital expenditure.

Executed hands-on mitigation and network restoration, pulling compromised hardware from the field for isolated remediation before redeployment.

Education

Coursera

Google Professional Cybersecurity Certification, Cybersecurity · (May 2023 - October 2023)

Dallas College

Coursework, Cybersecurity · (2017)
